Dear Human Resources Representative,

I am seeking an opportunity to learn, contribute and succeed in the dynamic media industry.

Having earned my Bachelor of Science in *Business, Language, & Culture*, from the Copenhagen Business School, I understand the power of culture in a business-context and am determined to work for a driven company that challenges and embraces culture to achieve success. Technology, Media, Management, and Product Creation are my particular areas of interest. I am eager to learn multifaceted, and want to contribute to a value-driven company whose product or service is data-driven and whose vision is rooted in democratic principles and the future publishing thoroughly processed data. While my experiences as a soccer player across multiple countries have taught me discipline and adaptation, my experience as a developer has taught me experimentation and appreciation for errors. Having gotten glimpses of various tech scopes, as a Junior FullStack Developer, I now know that I want to expand my learning in digitalisation within the scope of multi-media because it excites me.

Curiosity, spirit, and goal-oriented are characteristics, which will enable me to contribute quickly and proactively in a new business environment demanding open-mindedness, tenacity, and teamwork.

Through my international background, I have developed strong communication skills, positive attitude to teamwork, and dexterity to adapt to change. A strong commitment to excel, coupled with self-discipline is a mindset I bring to the table.

The enclosed resume details my experience and qualifications. Please contact me if you see me fit for your FullStack Content position. Thank you for your time and consideration. I am looking forward to hearing from you.

Sincerely,
